

The Bio-Resonance Exam

The process begins by taking energetic readings and measuring the body's capacitive reaction. The capacitive reaction is the body's resistance to the flow of energy.

Through this process, customized frequencies relating to specific issues (please see below for all the things we test) are output by the machine into the handles. If any of the frequencies create a disturbance to any energetic component, cellular component, tissue, organ or system of the body, the machine will identify it.

The machine then matches remedies (vitamins, minerals, herbals, homeopathics, etc.) that will balance the underlying disturbance.

Your health is made up of biochemistry, energy, physical, emotional and spiritual components.

After the exam we will make supplement recommendations, dietary suggestions, work on you physically and make a custom imprint of the correct remedies to balance energy, emotions, and biochemistry.

The custom imprint is made similar to copying a song from a CD onto an MP3 player. The song is copied from the CD into the computer then imprinted (copied) to the MP3 player.

What We Test – (on every visit)

Organs	Food Allergies
Glands	Environmental Allergies
Hormones	Animal Allergies
Neurotransmitters	Phenol Allergies
Amino Acids	Emotions
Energy Imbalances	Heavy Metals
Dental Disturbances	Chemical Toxins
Muscles	Bacterial Load
Bones	Viral Load
Joints	Fungal Load
Connective Tissue	Parasitic Load
